milkstork®

“I love it! I never have to worry about my milk going bad during the day.”

PERFECT FOR:

- Reusable, deskside breast milk storage
- Commuting
- Travel Days
- Day Trips

THE COOL COMMUTER™

Pumping on the go just got a whole lot easier. With the reusable Cool Commuter, pumping parents now have convenient access to on-the-go refrigeration. Thanks to its powerful insulation, the Cool Commuter brings body temperature breast milk down to CDC-approved refrigerated temperatures for safe breast milk storage, and keeps it cold for up to 15 hours! Whether it's personal breast milk storage at the office, a day of travel, or just living life, all pumping parents have to do is pump, pack, and go.

WHAT IT DOES:

- Cools body temperature breast milk down to CDC-approved refrigerated temperatures.
- Holds 24 oz. of breast milk and keeps it cold for up to 15 hours.
- Simplifies pumping on the go for breast/chestfeeding employees.
